Item 2.02. Results of Operations and Financial Condition.

On February 27, 2018, Endo International plc (the "Company," "Endo," or "we") issued an earnings release announcing its financial results for the three and twelve months ended December 31, 2017 (the "Earnings Release"). A copy of the Earnings Release is attached as Exhibit 99.1 hereto and is incorporated herein by reference.

The Company utilizes certain financial measures that are not prescribed by or prepared in accordance with accounting principles generally accepted in the U.S. ("GAAP"). The Company utilizes these financial measures, commonly referred to as "non-GAAP," because (i) they are used by the Company, along with financial measures in accordance with GAAP, to evaluate the Company's operating performance; (ii) the Company believes that they will be used by certain investors to measure the Company's operating results; (iii) the Compensation Committee of the Company's Board of Directors uses adjusted diluted EPS and Adjusted EBITDA, or measures derived from such, in assessing the performance and compensation of substantially all of the Company's employees, including executive officers and (iv) the Company's leverage ratio, as defined by the Company's credit agreement, is calculated based on non-GAAP financial measures. The Company believes that presenting these non-GAAP measures provides useful information about the Company's performance across reporting periods on a consistent basis by excluding certain items, which may be favorable or unfavorable, pursuant to the procedure as described in the succeeding paragraph.

The initial identification and review of the non-GAAP adjustments necessary to arrive at these non-GAAP financial measures are performed by a team of finance professionals that include the Chief Accounting Officer and segment finance leaders in accordance with the Company's Adjusted Income Statement Policy, which is reviewed and approved by the Company's Audit Committee. Company tax professionals, including the Vice President of Tax, review and determine the tax effect of adjusted pre-tax income at applicable tax rates and other tax adjustments as described below. Proposed adjustments, along with any items considered but excluded, are presented to the Chief Accounting Officer, Chief Executive Officer and/or the Chief Financial Officer for their consideration. In turn, the non-GAAP adjustments are presented to the Audit Committee on a quarterly basis as part of the Company's standard procedures for preparation and review of the earnings release and other quarterly materials.

These non-GAAP measures should be considered supplemental to and not a substitute for financial information prepared in accordance with GAAP. The Company's definition of these non-GAAP measures may differ from similarly titled measures used by others. The definitions of the most commonly used non-GAAP financial measures are presented below:

Adjusted income from continuing operations

Adjusted income from continuing operations represents income (loss) from continuing operations, prepared in accordance with GAAP, adjusted for certain items. Adjustments to GAAP amounts may include, but are not limited to, certain upfront and milestone payments to partners; acquisition-related and integration items, including transaction costs, earn-out payments or adjustments, changes in the fair value of contingent consideration and bridge financing costs; cost reduction and integration-related initiatives such as separation benefits, retention payments, other exit costs and certain costs associated with integrating an acquired company's operations; excess costs that will be eliminated pursuant to integration plans; asset impairment charges; amortization of intangible assets; inventory step-up recorded as part of our acquisitions; certain non-cash interest expense; litigation-related and other contingent matters; gains or losses from early termination of debt; foreign currency gains or losses on intercompany financing arrangements; and certain other items; further adjusted for the tax effect of adjusted pre-tax income at applicable tax rates and other tax adjustments as described below.

Adjusted diluted earnings per share from continuing operations and adjusted diluted weighted average shares

Adjusted diluted earnings per share from continuing operations represent adjusted income from continuing operations divided by the number of adjusted diluted weighted average shares.

Both GAAP and non-GAAP diluted per share data is computed based on weighted average shares outstanding and, if there is net income from continuing operations (rather than net loss) during the period, the dilutive impact of share equivalents outstanding during the period. Diluted weighted average shares outstanding and adjusted diluted weighted average shares outstanding are calculated on the same basis except for the net income or loss figure used in determining whether to include such dilutive impact.

Adjusted gross margin

Adjusted gross margin represents total revenues less cost of revenues, prepared in accordance with GAAP, adjusted for the items enumerated above under the heading "Adjusted income from continuing operations," to the extent such items relate to cost of revenues. Such items may include, but are not limited to, amortization of intangible assets and inventory step-up recorded as part of our acquisitions, certain excess inventory reserves resulting from restructuring initiatives, separation benefits and certain excess costs that will be eliminated pursuant to integration plans.

Adjusted operating expenses

Adjusted operating expenses represent operating expenses, prepared in accordance with GAAP, adjusted for the items enumerated above under the heading "Adjusted income from continuing operations," to the extent such items relate to operating expenses. Such items may include, but are not limited to, certain upfront and milestone payments to partners; acquisition-related and integration items, including transaction costs, earn-out payments or adjustments, changes in the fair value of contingent consideration and bridge financing costs; cost reduction and integration-related initiatives such as separation benefits, retention payments, other exit costs and certain costs associated with integrating an acquired company's operations; excess costs that will be eliminated pursuant to integration plans; asset impairment charges; amortization of intangible assets; litigation-related and other contingent matters; and certain other items.

Adjusted interest expense

Adjusted interest expense represents interest expense, net, prepared in accordance with GAAP, adjusted for certain non-cash interest expense and penalty interest.

Adjusted income taxes

Adjusted income taxes are calculated by tax effecting adjusted pre-tax income and permanent book-tax differences at the applicable effective tax rate that will be determined by reference to statutory tax rates in the relevant jurisdictions in which the Company operates. Adjusted income taxes include current and deferred income tax expense commensurate with the non-GAAP measure of profitability. Adjustments are then made for certain items relating to prior years and for tax planning actions that are expected to be distortive to the underlying effective tax rate and trend in the effective tax rate. The most directly comparable GAAP financial measure for Adjusted income taxes is income tax expense (benefit), prepared in accordance with GAAP. The adjusted effective tax rate represents the rate generated when dividing adjusted income tax expense or benefit by the amount of adjusted pre-tax income.

EBITDA and Adjusted EBITDA

EBITDA represents net income (loss) before interest expense, net; income tax; depreciation; and amortization, each prepared in accordance with GAAP. Adjusted EBITDA further adjusts EBITDA by excluding other (income) expense, net; share-based compensation; certain upfront and milestone payments to partners; acquisition-related and integration items, including transaction costs, earn-out payments or adjustments, changes in the fair value of contingent consideration and bridge financing costs; cost reduction and integration-related initiatives such as separation benefits, retention payments, excess inventory reserves, other exit costs and certain costs associated with integrating an acquired company's operations; excess costs that will be eliminated pursuant to integration plans; asset impairment charges; inventory step-up recorded as part of our acquisitions; litigation-related and other contingent matters; gains or losses from early termination of debt; discontinued operations, net of tax; and certain other items.

Net Debt and Net Debt Leverage Ratio

Net debt is calculated as the aggregate carrying amount of debt outstanding less unrestricted cash and cash equivalents.

The net debt leverage ratio is calculated as net debt divided by adjusted EBITDA for the trailing twelve-month period.

Because adjusted financial measures exclude the effect of items that will increase or decrease the Company's reported results of operations, the Company strongly encourages investors to review the Company's consolidated financial statements and publicly filed reports in their entirety. Investors are also encouraged to review the reconciliation of the non-GAAP financial measures used in the Earnings Release to their most directly comparable GAAP financial measures as included in the Earnings Release and within the quarterly earnings presentation available in the Investor Relations section of the Registrant's website at <http://www.endo.com>. However, the Company does not provide reconciliations of projected non-GAAP financial measures to GAAP financial measures, nor does it provide comparable projected GAAP financial measures for such projected non-GAAP financial measures. The Company is unable to provide such reconciliations without unreasonable efforts due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliations, including adjustments that could be made for asset impairments, contingent consideration adjustments, legal settlements, loss on extinguishment of debt, adjustments to inventory and other charges reflected in the reconciliation of historic numbers, the amount of which could be significant.

The information in this Item 2.02 and in Exhibit 99.1 attached hereto shall not be deemed to be "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that section. The information contained in this Item 2.02 and in Exhibit 99.1 attached hereto shall not be incorporated into any registration statement or other document filed by the Registrant with the U.S. Securities and Exchange Commission under the Securities Act of 1933, whether made before or after the date hereof, regardless of any general incorporation language in such filing, except as shall be expressly set forth by specific reference in such filing.

DUBLIN, February 27, 2018 -- Endo International plc (NASDAQ: ENDP) today reported fourth-quarter 2017 financial results, including:

- Revenues of \$769 million, a 38 percent decrease compared to fourth-quarter 2016 revenues of \$1,242 million.
- Reported net loss from continuing operations of \$272 million compared to fourth-quarter 2016 reported net loss from continuing operations of \$3,333 million.
- Reported diluted loss per share from continuing operations of \$1.22 compared to fourth-quarter 2016 reported diluted loss per share from continuing operations of \$14.96.
- Adjusted income from continuing operations of \$174 million compared to fourth-quarter 2016 adjusted income from continuing operations of \$396 million.
- Adjusted diluted EPS from continuing operations of \$0.77 compared to fourth-quarter 2016 adjusted diluted EPS from continuing operations of \$1.77.
- Adjusted EBITDA of \$327 million compared to fourth-quarter 2016 adjusted EBITDA of \$556 million.

"Despite the challenges impacting the U.S. generics industry, Endo delivered solid operating results in 2017, including strong adjusted EBITDA generation," said Paul Campanelli, President and CEO of Endo.

“Importantly, those core areas of focus where we continue to invest outperformed in 2017, as Sterile Injectables and Branded Specialty Products both achieved double-digit growth. We enter 2018 leaner and better positioned for the future, and the year has already been marked by a pivotal event. Earlier this month, we began our Phase 3 clinical trials of CCH for the treatment of cellulite. We view this as a major milestone for a new and important potential growth driver for our Company.”

FINANCIAL PERFORMANCE

| Adjusted Diluted EPS from Continuing Operations | \$ 0.77 | \$ 1.77 | (56)% | \$ 3.84 | \$ 4.73 | (19)% |

(1) Diluted per share data is computed based on weighted average shares outstanding and, if there is income from continuing operations during the period, the dilutive impact of share equivalents outstanding during the period. In the case of Adjusted Diluted Weighted Average Shares, Adjusted Income from Continuing Operations is used in determining whether to include such dilutive impact.

CONSOLIDATED RESULTS

Total revenues decreased by 38 percent to \$769 million in fourth-quarter 2017 compared to the same period in 2016. The decline was primarily due to the loss of marketing exclusivity in the first half of 2017 for the first-to-file U.S. Generic Pharmaceuticals products ezetimibe tablets, the generic version of ZETIA[®], and quetiapine extended-release (ER) tablets, the generic version of SEROQUEL XR[®], both of which launched in fourth-quarter 2016. Also contributing to the decline in total revenues were previously announced U.S. Generic Pharmaceuticals product discontinuances, pricing pressure from increased competition primarily impacting the U.S. Generics Base business, the divestitures of Litha and Somar, as well as the cessation of OPANA[®] ER shipments to customers by September 1, 2017.

GAAP net loss from continuing operations in fourth-quarter 2017 was \$272 million compared to GAAP net loss from continuing operations of \$3,333 million during the same period in 2016. This decrease included the impact of lower asset impairment charges and intangible asset amortization in fourth-quarter 2017. GAAP diluted net loss per share from continuing operations for fourth-quarter 2017 was \$1.22, compared to GAAP diluted net loss per share from continuing operations of \$14.96 in fourth-quarter 2016.

Adjusted income from continuing operations in fourth-quarter 2017 was \$174 million compared to \$396 million in fourth-quarter 2016. This decrease resulted primarily from lower revenues of ezetimibe tablets, quetiapine ER tablets, Base business generic products and OPANA[®] ER as well as an increase in interest expense, mainly due to the refinancing of the Company's secured debt in April 2017, which enhanced operational flexibility and extended the Company's maturity schedule. Adjusted diluted EPS from continuing operations in fourth-quarter 2017 was \$0.77 compared to \$1.77 in fourth-quarter 2016.

U.S. GENERIC PHARMACEUTICALS

During fourth-quarter 2017, the U.S. Generic Pharmaceuticals segment launched six products and submitted two regulatory filings. In 2017, the U.S. Generic Pharmaceuticals segment launched 17 new generic products and the Company made 12 regulatory submissions. As of December 31, 2017, the Company had approximately 100 Abbreviated New Drug Applications pending with the U.S. Food and Drug Administration.

Fourth-quarter 2017 U.S. Generic Pharmaceuticals results include:

- Revenues of \$499 million, a 43 percent decrease compared to fourth-quarter 2016; this decline was primarily attributable to the loss of marketing exclusivity in the first half of 2017 for the first-to-file products ezetimibe tablets and quetiapine ER tablets. Also contributing to the decline were previously announced product discontinuances and pricing pressure from increased competition primarily impacting the Base business.
- Sterile Injectables revenue increased 16 percent compared to fourth-quarter 2016; this increase was driven primarily by ADRENALIN[®].
- New Launches and Alternative Dosages revenue decreased 67 percent compared to fourth-quarter 2016; this decrease was driven primarily by the expiration of the marketing exclusivity periods for ezetimibe tablets and quetiapine ER tablets.

- The U.S. Generics Base business revenues decreased 37 percent compared to fourth-quarter 2016; this decrease primarily resulted from the impact of 2016 and 2017 competitive events, previously announced product discontinuances and the continued impact of pricing due to consolidation among our trade accounts.

U.S. BRANDED PHARMACEUTICALS

In February 2018, Endo announced the initiation of two Phase 3 clinical trials of collagenase clostridium histolyticum (or “CCH”) for the treatment of cellulite.

Fourth-quarter 2017 U.S. Branded Pharmaceuticals results include:

- Revenues of \$228 million, a 21 percent decrease compared to fourth-quarter 2016; this decrease was primarily attributable to the decline in revenues of OPANA[®] ER resulting from the cessation of product shipments by September 1, 2017 and generic competition adversely impacting the Company's Established Products portfolio.
- Specialty Products revenues increased 8 percent in fourth-quarter 2017 versus the same period in 2016, driven by strong performance from XIAFLEX[®] and other products within our Specialty Products portfolio. Sales of XIAFLEX[®], our flagship Branded product, increased 10 percent compared to fourth-quarter 2016; this increase was primarily attributable to volume growth that was driven, in part, by a full year of direct-to-consumer initiatives intended to increase patient awareness of XIAFLEX[®] as a possible treatment option for Dupuytren's Contracture and Peyronie's Disease.

INTERNATIONAL PHARMACEUTICALS

Fourth-quarter 2017 International Pharmaceuticals revenues were \$41 million, compared to \$70 million in the same period in 2016. The decline is primarily attributable to the sale of the Company's South African Litha business to Acino Pharma AG, which closed on July 3, 2017, and the sale of the Company's Mexican Somar business to Advent International, which closed on October 25, 2017.

2018 FINANCIAL GUIDANCE

For the full twelve months ending December 31, 2018, at current exchange rates, Endo is providing guidance on revenue, adjusted diluted EPS from continuing operations and adjusted EBITDA from continuing operations. The Company estimates:

- Total revenues to be between \$2.6 billion and \$2.8 billion;
- Adjusted diluted EPS from continuing operations to be between \$2.15 and \$2.55; and

- Adjusted EBITDA from continuing operations to be between \$1.2 billion and \$1.3 billion.

The Company's 2018 non-GAAP financial guidance is based on the following assumptions:

- Adjusted gross margin of approximately 67.0% to 68.0%;
- Adjusted operating expenses as a percentage of revenues of approximately 25.5% to 26.5%;
- Adjusted interest expense of approximately \$530 million to \$540 million;
- Adjusted effective tax rate of approximately 11.0% to 12.0%; and
- Adjusted diluted weighted average shares outstanding of approximately 226 million.

BALANCE SHEET, LIQUIDITY AND OTHER UPDATES

As of December 31, 2017, the Company had \$987 million in unrestricted cash; debt of \$8.3 billion; net debt of approximately \$7.3 billion and a net debt to adjusted EBITDA ratio of 4.6.

Fourth-quarter 2017 cash provided by operating activities was \$132 million, compared to \$84 million of net cash provided by operating activities in the comparable 2016 period. The 2016 period was impacted by higher payments related to U.S. mesh product liability claims.

During fourth-quarter 2017, the Company recorded pre-tax, non-cash asset impairment charges of \$130 million, \$126 million of which related to in-process research and development and developed technology intangible assets in its U.S. Generic Pharmaceuticals segment.

In addition, the Company recorded a total increase of approximately \$200 million to its legal reserves relating to both LIDODERM[®] antitrust matters and Testosterone Replacement Therapy (TRT) product liability matters after determining that a loss is probable and reasonably estimable. The LIDODERM[®] portion of the reserve increase includes an estimated loss for, among other matters, a settlement in principle of all remaining claims filed against the Company's subsidiary, Endo Pharmaceuticals Inc., in *In re Lidoderm Antitrust Litigation*, MDL No. 2521, pending in the U.S. District Court for the Northern District of California. The TRT portion of the reserve increase includes an estimated loss for, among other matters, all testosterone-related product liability cases filed against the Company's subsidiaries in *In Re Testosterone Replacement Therapy Products Liability Litigation*, MDL No. 2545, pending in the U.S. District Court for the Northern District of Illinois, and in other courts. In February 2018 the court in MDL No. 2545 entered a case management order reporting that the parties had entered into a memorandum of understanding regarding a potential global settlement and directing that all proceedings involving the Company's subsidiaries be temporarily stayed so that the parties may devote their efforts to finalizing a master settlement agreement.

SUPPLEMENTAL FINANCIAL INFORMATION

To supplement the financial measures prepared in accordance with U.S. generally accepted accounting principles (GAAP), the Company uses certain non-GAAP financial measures. For additional information on the Company's use of such non-GAAP financial measures, refer to Endo's Current Report on Form 8-K furnished today to the Securities and Exchange Commission, which includes an explanation of the Company's reasons for using non-GAAP measures.

The tables below provide reconciliations of certain of our non-GAAP financial measures, both historical and forward-looking, to their most directly comparable GAAP amounts. Refer to the "Notes to the Reconciliations of GAAP and Non-GAAP Financial Measures" section below for additional details regarding the adjustments to the non-GAAP financial measures detailed throughout this Supplemental Financial Information section.

- (7) To exclude litigation-related settlement charges, reimbursements and certain settlements related to intellectual property suits previously filed by our subsidiaries.
- (8) To exclude pre-tax, non-cash goodwill, intangible asset and property, plant and equipment impairment charges.

During the fourth quarter of 2017, we recorded total pre-tax, non-cash impairment charges of \$130 million. Approximately \$125 million was largely the result of market conditions impacting the recoverability of certain indefinite and finite-lived intangible assets in our U.S. Generic Pharmaceuticals segment. The remaining charges during the fourth quarter were related to plant, property and equipment impairments.

During the third quarter of 2017, we recorded total pre-tax, non-cash impairment charges of \$95 million. Approximately \$17 million was related to property, plant and equipment charges related to our previously announced restructuring initiatives and held-for-sale accounting for Somar. The remaining charges during the third quarter were largely the result of market conditions impacting the recoverability of certain indefinite and finite-lived intangible assets in our U.S. Generic Pharmaceuticals and U.S. Branded Pharmaceuticals segments.

During the second quarter of 2017, we recorded total pre-tax, non-cash impairment charges of \$725 million. We announced the 2017 U.S. Generic Pharmaceuticals Restructuring Initiative in July 2017, which includes the discontinuation of certain commercial products. As a result, we assessed the recoverability of the impacted products, resulting in pre-tax, non-cash intangible asset impairment charges of approximately \$58 million. We also recorded property, plant and equipment impairments related to this restructuring totaling \$32 million. As a result of the decision to withdraw OPANA® ER, we determined that the carrying amount of this intangible asset was no longer recoverable, resulting in a pre-tax, non-cash impairment charge of \$21 million, representing the remaining carrying amount. As a result of the aforementioned actions related to OPANA® ER and the continued erosion of its U.S. Branded Pharmaceuticals segment's Established Products portfolio, we initiated an interim goodwill impairment analysis of our Branded reporting unit. We recorded a pre-tax, non-cash asset impairment charge of \$180 million for the amount by which the carrying amount exceeded the reporting unit's fair value. We entered into a definitive agreement to sell Somar on June 30, 2017, which resulted in Somar's assets and liabilities being classified as held for sale. The initiation of held-for-sale accounting, together with the agreed upon sale price, triggered an impairment review. Accordingly, we performed an impairment analysis using a market approach and determined that impairment charges were required. We recorded pre-tax non-cash impairment charges of \$26 million, \$90 million and \$10 million related to Somar's goodwill, other intangible assets and property, plant and equipment, respectively. The remaining charges during the second quarter were largely the result of market conditions impacting the recoverability of certain indefinite and finite-lived intangible assets in our U.S. Generic Pharmaceuticals, U.S. Branded Pharmaceuticals and International Pharmaceuticals segments.

During the first quarter of 2017, we recorded total pre-tax, non-cash impairment charges of \$204 million. Pursuant to an existing agreement with Novartis AG, Endo's subsidiary, Paladin Labs Inc., licensed the Canadian rights to commercialize serelaxin, an investigational drug for the treatment of acute heart failure (AHF). On March 22, 2017, Novartis announced that a Phase III study of serelaxin in patients with AHF failed to meet its primary endpoints. As a result, Endo has concluded that its serelaxin in-process research and development intangible asset is fully impaired resulting in a \$45 million non-cash impairment charge. As a result of the serelaxin intangible impairment, Endo assessed the recoverability of its Paladin goodwill balance and determined that the estimated fair value of the Paladin reporting unit was below its book value, resulting in a non-cash goodwill impairment charge of \$83 million. The remaining charges were largely the result of certain market conditions impacting the recoverability of developed technology intangible assets in Endo's U.S. Generic Pharmaceuticals segment.

During the fourth quarter of 2016, in connection with our annual goodwill impairment assessment, we recorded pre-tax, non-cash goodwill impairment charges of \$2,343 million, \$273 million, \$33 million and \$26 million for our U.S. Generics, Paladin, Somar and Litha reporting units, respectively. Additionally, we recorded pre-tax, non-cash intangible asset impairment charges of \$830 million, including: (i) approximately \$507 million and \$285 million related our U.S. Generic Pharmaceuticals and International Pharmaceuticals segments, respectively, resulting from certain market conditions, including price erosion and increased competition and (ii) \$38 million related to our U.S. Branded Pharmaceuticals segment, resulting primarily from the termination of our BELBUCA™ product. As a result of unfavorable formulary changes and generic competition for sumatriptan, we experienced a downturn in the performance of our SUMAVEL® DOSEPRO® product, resulting in a non-cash impairment charge of \$73 million during the third quarter of 2016. Also during the third quarter of 2016, we determined that we would not pursue commercialization of a product in certain international markets, resulting in a non-cash asset impairment charge of \$16 million. As a result of the 2016 U.S. Generic Pharmaceuticals Restructuring Initiative, we recorded \$100 million of non-cash impairment charges during the first quarter of 2016 resulting from the discontinuation of certain commercial products and the abandonment of certain IPR&D projects. The remaining charges during the first nine months of 2016 were largely the result of market and regulatory conditions impacting the recoverability certain indefinite and finite-lived intangible assets in our U.S. Generic Pharmaceuticals segment.

(9) Adjustments for acquisition and integration items primarily relate to various acquisitions. Amounts included the following (in thousands):

(14) Adjusted income taxes are calculated by tax effecting adjusted pre-tax income and permanent book-tax differences at the applicable effective tax rate that will be determined by reference to statutory tax rates in the relevant jurisdictions in which the Company operates. Adjusted income taxes include current and deferred income tax expense commensurate with the non-GAAP measure of profitability.

As previously disclosed, during the second quarter of 2016, Endo recorded a discrete GAAP tax benefit of \$636 million arising from outside basis differences generated as part of a legal entity restructuring. This benefit and the associated component of the 2016 U.S. federal return to provision adjustment recorded in the third quarter of 2017 were excluded from our adjusted effective tax rate in accordance with the Company's non-GAAP accounting policy.

- (15) To exclude the results of the businesses reported as discontinued operations, net of tax in the Condensed Consolidated Statement of Operations.
- (16) Net income attributable to noncontrolling interests is excluded from Adjusted EBITDA (non-GAAP) and Net (loss) income attributable to Endo International plc.
- (17) Calculated as Net (loss) income from continuing operations divided by the applicable weighted average share number. The applicable weighted average share numbers are as follows (in thousands):

Non-GAAP Financial Measures

The Company utilizes certain financial measures that are not prescribed by or prepared in accordance with accounting principles generally accepted in the U.S. (GAAP). These Non-GAAP financial measures are not, and should not be viewed as, substitutes for U.S. GAAP net income and its components and diluted earnings per share amounts. Despite the importance of these measures to management in goal setting and performance measurement, we stress that these are Non-GAAP financial measures that have no standardized meaning prescribed by U.S. GAAP and, therefore, have limits in their usefulness to investors. Because of the non-standardized definitions, Non-GAAP adjusted EBITDA and Non-GAAP adjusted net income from continuing operations and its components (unlike U.S. GAAP net income from continuing operations and its components) may not be comparable to the calculation of similar measures of other companies. These Non-GAAP financial measures are presented solely to permit investors to more fully understand how management assesses performance.

Investors are encouraged to review the reconciliations of the non-GAAP financial measures used in this press release to their most directly comparable GAAP financial measures. However, the Company does not provide reconciliations of projected non-GAAP financial measures to GAAP financial measures, nor does it provide comparable projected GAAP financial measures for such projected non-GAAP financial measures. The Company is unable to provide such reconciliations without unreasonable efforts due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliations, including adjustments that could be made for asset impairments, contingent consideration adjustments, legal settlements, loss on extinguishment of debt, adjustments to inventory and other charges reflected in the reconciliation of historic numbers, the amount of which could be significant.

See Endo's Current Report on Form 8-K furnished today to the Securities and Exchange Commission for an explanation of Endo's non-GAAP financial measures.

Cautionary Note Regarding Forward-Looking Statements

This press release contains forward-looking statements, including but not limited to the statements by Mr. Campanelli, as well as other statements regarding product development, market potential, corporate strategy, optimization efforts and restructurings, expected growth and regulatory approvals, together with Endo's earnings per share from continuing operations amounts, product net sales, revenue forecasts and any other statements that refer to Endo's expected, estimated or anticipated future results. Because forecasts are inherently estimates that cannot be made with precision, Endo's performance at times differs materially from its estimates and targets, and Endo often does not know what the actual results will be until after the end of the applicable reporting period. Therefore, Endo will not report or comment on its progress during a current quarter except through public announcement. Any statement made by others with respect to progress during a current quarter cannot be attributed to Endo.

All forward-looking statements in this press release reflect Endo's current analysis of existing trends and information and represent Endo's judgment only as of the date of this press release. Actual results may differ materially from current expectations based on a number of factors affecting Endo's businesses, including, among other things, the following: changing competitive, market and regulatory conditions; Endo's ability to obtain and maintain adequate protection for its intellectual property rights; the timing and uncertainty of the results of both the research and development and regulatory processes, including regulatory decisions, product recalls, withdrawals and other unusual items; domestic and foreign health care and cost containment reforms, including government pricing, tax and reimbursement policies; technological advances and patents obtained by competitors; the performance, including the approval, introduction, and consumer and physician acceptance of new products and the continuing acceptance of currently marketed products; the effectiveness of advertising and other promotional campaigns; the timely and successful implementation of strategic initiatives; the results of any pending or future litigation, investigations or claims; the uncertainty associated with the identification of and successful consummation and execution of external corporate development initiatives and strategic partnering transactions; and Endo's ability to obtain and successfully maintain a sufficient supply of products to meet market demand in a timely manner. In addition, U.S. and international economic conditions, including higher unemployment, political instability, financial hardship, consumer confidence and debt levels, taxation, changes in interest and currency exchange rates, international relations, capital and credit availability, the status of financial markets and institutions, fluctuations or devaluations in the value of sovereign government debt, as well as the general impact of continued economic volatility, can materially affect Endo's results. Therefore, the reader is cautioned not to rely on these forward-looking statements.

Endo expressly disclaims any intent or obligation to update these forward-looking statements except as required to do so by law.

Additional information concerning the above-referenced risk factors and other risk factors can be found in press releases issued by Endo, as well as Endo's public periodic filings with the U.S. Securities and Exchange Commission and with securities regulators in Canada, including the discussion under the heading "Risk Factors" in Endo's most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q.
